Guidelines for abstract submission

- Provide a concise and factual account of research in progress rather than a report on completed work;

- State briefly the purpose of the research, the principal results and major conclusions, in no more than 250 words;

- Non-standard or uncommon abbreviations should be defined at their first mention;

- If references are essential they must be cited in full, but they cannot be included in the published abstract.

- The abstract should stand alone and not include phrases such as "as I will show/you will see/will be discussed at the meeting …";

- The deadline for submitting abstracts is Tuesday 06 October 5pm UK time.
