

RSTMH Early Career Grants Programme – Terms and Conditions 2022

Purpose of Early Career Grants

To enable early career researchers and global health professionals in the field of tropical medicine or global health to undertake clinical or scientific research and/or fieldwork, either as stand-alone projects or distinct elements within a larger project. They are for those who have not received a research grant in their own name before. RSTMH anticipate that most applicants will be at the start of their careers, though it recognises that some more experienced professionals may be new to research and will still be eligible to apply for a grant.

Thematic priorities

Applications can be on any area of tropical medicine or global health. RSTMH's thematic priorities in its current strategy, plus other areas of health that are less well known are encouraged. These are listed below:

- Neglected Tropical Diseases (NTDs), with a particular focus on their overlap with Non-Communicable Diseases (NCDs) and the Sustainable Development Goals
- Malaria, with a particular focus on drug resistance
- One Health and wider planetary health. The consideration of human health alongside animal health and the environment, in the context of social, economic and political factors
- Topical issues including, but not limited to, emerging diseases
- Drug resistant infections
- Snakebite
- Mycetoma, and other skin NTDs
- Co-morbidity and NCDs
- Coronavirus
- Climate change

Early Career Grant value and timeline

The maximum RSTMH Early Career Grant award is GBP £5,000 including any relevant tax on purchases.

One or more awardees may be funded or part-funded by one of the specific funds listed below. If this is the case, we may ask you to participate in separate award activities.

- Sir Leonard Rogers Fund
- Denis Burkitt Fellowship Fund
- Garnham Fund
- Centenary fellowship Appeal Fund

The project should start between September and December 2022 after the planned payment dates, which is currently September 2022, but may change as a result of the number of applications. The project should be completed within a year. Please indicate on the application form if you expect the project to finish after this time.

Open for applications	1 February 2022
Deadline for applications	29 April 2022
Funding payments made	September 2022
Projects start	By December 2022
Projects finish	By December 2023
Reports due	By March 2024

The key dates for the programme are above. If you are not able to deliver your project or report to these timings (notwithstanding unexpected changes) then please consider whether you should apply this year.

If you are awarded but unable to complete your project within the timeframe RSTMH may ask for a refund of all unspent funds.

Early Career Grants eligible costs

The list below provides general guidance about the costs which are eligible under the Early Career Grants Programme. We do understand there may be exceptions to this guidance and would ask applicants to demonstrate and evidence the need for these higher costs as part of their budget description/table.

If an item costs more than the limits indicated below, applicants can use other sources of funding to top up e.g. If a piece of equipment costs £3,000 and only £2,000 is allowable under the programme, the applicant could cover the additional £1,000 from another source.

- Consumables
- Fieldwork expenses, including reasonable per diems for staff standard class travel to, from and within site(s) and accommodation
- International travel to carry out the research, total costs up to 50% of the overall budget
- The grant costs cannot be solely used for equipment, the total cost allowed is up to 50% of the overall budget
- Computers, tablets and phones, up to 20% of the overall budget

- Training course, tuition or bench fees that are related to and directly relevant to the project, up to 20% of the overall budget
- Local dissemination costs, up to 20% of the overall budget
- Ethics approval costs, up to 10% of the overall budget
- Reasonable contingency costs
- Tax on purchases where relevant

Receipts or evidence of purchase of all items must be kept for seven years after the final report has been submitted as they may be audited by RSTMH and/or funding partners.

If this grant application is part of a larger research programme, matched funding must be in place at the time of submission of the Early Career Grant application. In addition to the application budget, applicants must also include a brief outline of the larger research programme's budget in the application.

Early Career Grants ineligible costs

- Salaries for awardee
- Registration fees, travel and accommodation for conference or event attendance.
- Publishing costs/fees for academic journals¹. Awardees could be eligible for an automatic publication fee waiver or discount for our journals. More information can be found [here](#)
- Miscellaneous costs
- Business class travel or alcohol consumption
- Tuition fees for PhD or MSC

Application criteria

Applicants for an Early Career Grant can be based anywhere in the world and can be of any nationality.

Applicants must meet the following criteria:

- Awardees should not have received research funding in their own name before, unless the total value was less than £5,000
- Have a clear research plan for which they are seeking support
- Ideally be employed by, or affiliated to an organisation, though we will consider applications from those not affiliated or employed. Should awardees seek to transfer to another institution during an award, written permission is required from RSTMH and this may be granted only in exceptional circumstances
- Have access to adequate supervision, and for their supervisor to remain for the duration of the project

¹ RSTMH journals, like many others, offer waivers or discounted rates for publications costs. RSTMH also offer highly discounted rates to developing countries, based on the [Research4Life](#) eligibility criteria (*nb. does not include India*).

- Have the appropriate insurance to carry out the research
- Hold a registered bank account which accepts GBP. Please note that a condition of an award is that grant funds are paid into the awardee's personal bank account and not an institutional account. If this presents an issue, please let us know
- Be an RSTMH member. *Applications can be submitted from non-members but, if successful, awardees must join RSTMH before funding will be supplied.* Grants funded by RSTMH will have the membership fee deducted from their grant. If they are a non-member and the grant is funded by one of our partners, they will have their membership fees covered over and above the grant awarded
- Have not received an RSTMH grant before
- Have submitted only one application for an RSTMH grant per year
- Not be an RSTMH global assessor in the same year
- Not be a named supervisor or referee on an RSTMH grant application in the same year

Applicants are encouraged to include costs which would enable their projects to maximise diversity and inclusion, and community participation

References

The application must be supported by two referees, one of which should be a senior member of the employing or affiliated organisation. The other should be the applicant's direct supervisor for this project. References must be on headed paper and must be complete and uploaded to Submittable by the deadline. Applications without submitted references from both referees will be deemed incomplete and not assessed. Referees should use an institutional email address and not a personal email address to submit their reference. If that is not possible, a personal email address can be used, with justification.

The supervisor should assess and clearly comment on:

- The feasibility of achieving the project's aims with the resources defined in the application
- The relevance of the project to your research
- The benefit of the project to the wider community
- Verify that to the best of their knowledge the applicant meets the guidance for being early in their career
- The mentorship and support available to the applicant

The senior member from the employing or affiliated organisation should comment on:

- The training and career development opportunities available to the applicant
- The availability and use of relevant institutional resources

- The mentorship and career support available to the applicant

Guidance on 'early career' eligibility

The programme is for those who have not received research funding in their own name before. This is predominantly for those early in their overall careers.

We would like to ensure as many early career researchers and professionals can apply for an Early Career Grant as possible, and encourage people from a range of disciplines and sectors to apply.

To ensure equity and fairness of opportunity, RSTMH does not use a definition focused on specific roles, qualifications held, or age, instead it chooses to supply guidance around the profile of an applicant that may be suitable for an Early Career Grant.

Applicants should meet this profile and should not have received research funding in their name before. The applicant's supervisor must verify this as part of the reference and the application process.

We expect candidates not to have received a research grant in their own name before. They should be able to:

- Carry out research under supervision
- Have the ambition to develop knowledge of research methodologies and discipline
- Have demonstrated a good understanding of a field of study
- Demonstrate the ability to produce data under supervision
- Use critical analysis, evaluation and be able to synthesise new and complex ideas
- Competently explain the outcome of their research and value thereof to colleagues

Criteria used to assess applications for Early Career Grants

- Early career status
- Importance of the proposed research
- Quality of the project design and methodology
- Feasibility of the project
- Impact of your research project
- Environment, mentoring, support
- Value for money

Requirements of awardees

Awardees must ensure that:

- The Grant is used only for the Grant activities;

- The Grant activities are supported by adequate and appropriate resources and facilities throughout the Grant Period.

Grants awarded cannot be transferred to other individuals or institutions. Awardees must inform RSTMH if their personal or professional circumstances change throughout the application and award process.

Awardees must hold a personal bank account. We can pay awards to institutions in exceptional circumstances, applicants should inform us immediately if they are not able to accept the award into their own personal account.

If the research involved animals, awardees must ensure they abide by the local laws

Awardees must tell us at once if there is a change to the scope of the Grant activities (including, where relevant, any increase in the number of animals used), or if there are any factors that may adversely affect the Grant activities or compliance with the Terms and Conditions. This includes suspicion of or actual fraud, corruption or financial impropriety, or any change to your or the Awardee's status. Any changes to the project made after selection must be approved before the project starts by the Grants and Awards Committee, and will only be approved in exceptional cases.

Awardees must repay to RSTMH:

- any part of the Grant that has not been spent when the Grant activities have been completed;
- any part of the Grant used in breach of the Terms and Conditions.

Awardees are responsible for any expenditure on the Grant activities which exceeds the amount of the Grant.

* There may be separate requirements and/or conditions if you are awarded by one of RSTMH's partners.

Reporting and dissemination

A report (minimum 1,000 words) must be submitted to RSTMH through the submittable portal for formal review by the Grants and Awards Committee and for potential promotion by RSTMH within three months of the project being completed.

The report should contain the following elements:

- Result of the project
- Outcomes of the project
- Information about any leverage or impact of the project on
 - your career
 - your ongoing research
 - the field of tropical medicine or global health

- details of other ways the grant has helped you
- Any images that help to illustrate your research and outcomes
- How you plan to disseminate the results of your project

When preparing the Early Career Grant final report, you must include your project budget and budget expenditure. The expenditure should include a brief breakdown of what was spent. The amounts should be in British pounds (GBP). You should also have collected or produced receipts for all payments made, which RSTMH or its funding partners may need for audit purposes. Failure to submit the report within this timeframe may result in RSTMH asking for a refund of all unspent funds. In such cases, future applications for funding will not be considered.

RSTMH's support must be acknowledged in all written publications and oral presentations arising from the project. The RSTMH logo will be supplied for this purpose, and other materials can be provided on request.

Failure to disseminate results and to acknowledge the support of RSTMH will result in monies being recovered and future grant applications being disregarded.

For transparency, RSTMH would like to announce its Early Career Grant recipients on its website, social media channels and through its communications. If you have any concerns about this, please let us know.

Once the reports about your proposal are received, RSTMH would like to talk to you about how it can showcase this work in its journals, at its meetings and through its communications channels. It is your responsibility to let us know of any information in your application form that is sensitive. Please let us know if you would like us to help promote your work.

Withdrawal of Early Career Grants

RSTMH reserves the right at any time and without notice to withdraw an Early Career Grant, either in full or in part, if the awardee fails materially to comply with these conditions.

Modification or variation of conditions

RSTMH reserves the right to modify, add to, or vary these conditions, as it sees fit. It will give prior notice to the awardees of any changes. RSTMH will seek to ensure that the awardee is not disadvantaged by such changes.

By applying for an RSTMH Early Career Grant, you are agreeing to share the details of your application with RSTMH, including its team and volunteers, its selected suppliers and funding partners and assessors for the purpose of assessing and managing your application, and if your application is successful, of supporting your research.

For transparency, RSTMH will use anonymised data from applications for marketing purposes to demonstrate the number, geographical spread, gender mix,

disease and sector representation. By applying for an Early Career Grant you are agreeing to these terms and conditions.

The decision of the Grants and Awards Committee is final.

If you have any technical problems with filling out an application form, please email support@submittable.com

If you have a question about the scope and content of your proposal, please email amelia.fincham@rstmh.org and tamar.ghosh@rstmh.org.
